

Reproduction center of berry fruits "H&H Fruit" is the largest complex in the region, and it consists of:

- Modern berry fruit nursery;
- Facilities for freezing and drying fruits and vegetables, forest fruits, medicinal and aromatic herbs, and mushrooms;
- Final products are certified organic (forest fruits, mushrooms, and medicinal and aromatic herbs).

Nursery: A large number of species, types and varieties of berry fruit, container-type seedlings, bare root plants and root cuttings.

Modern processing facilities: raw material storage, deep freezing, screening, grading to final products, drying, packaging, and storage of final products, with integral certification system.

Final products: fruits, plants and mushrooms from the wild - certified organic.

Certificate for Organic Production

The production at above operator meets the requirements laid down in Council Regulation (EC) No 834/2007 and KRAV Standards. The operator is responsible for that only products produced in accordance with KRAV standard are labelled and advertised as KRAV certified organic.
