# FUTURE

With this approach H&H Fruit represents a unique example in regional development through direct and indirect employment, increasing the cultivable land protecting the natural populations for the agricultural benefit while being oriented towards the exporting and producing base for the future.

Heko Company is opened for all kinds of cooperation in terms of cooperation business by giving plants and guarantee for purchase of produced fruits and for safe selling of final products whether on home or foreign market. H&H Fruit was subsequently established as a result of expanding the basic activity of the agricultural complex HEKO doo Bugojno which is oriented towards primary and secondary agricultural production and agro - tourism.

The primary activities are linked to the agricultural production: fruit-growing, cattle breeding, farming, and gardening production.

The addition to all activities is a part of rural tourism as a connection between above mentioned production and the final products.

## STORAGE

## AND PROCESSING...

# STORAGE AND SPROCESSING

Company Heko doo deals with primary and secondary agricultural production. With its brand H&H Fruit and motto "Our Fruit your Health" company owns a modern nursery for the berry fruits plant production and facility for storage and processing berry fruit and a number of wild fruits. H&H Fruit owns a cold storage 1000 tones capacity for storage and processing which is located directly by the main road in direction Bugojno – Split on a way from Bugojno to Kupres.

In cold storage there's a gate for receiving goods, cooling chambers and deep freeze for all the received goods, rooms for sorting and processing, hallway and six chambers for storage of frozen products. The unnecessary parts of this line are vehicles with adequate conditions for good transport of fruits from the place of purchase to the place of storage.

In Bosnia and Herzegovina and in the region Heko Company with its branch H&H Fruit represents a unique example of successful business and a positive development of the entire region in the agriculture production.

# RAW MATERIAL PURCHASE

The 2009 season is marked with the beginning of the raspberry purchase from the production fields in wide area of Bosnia and Herzegovina and other berry fruit: strawberry and blackberry and numerous wild fruits. Goods are transported in adequate vehicles from fields and after that they go into the cold storage where all the activities are according to the EU standards for this branch.

After the goods have been brought to the cold storage, the phase of cooling and deep freeze follows. After the freezing is finished, the next step is calibrating and sorting according to the qualitative categories and at the end it all goes to packaging and sorting of products which are exported for market.

Today our company deals with berry fruit purchase from the production fields i.e. cultivated **raspberry**, **blackberry**, **strawberry**, **blueberry** etc. and numerous wild fruits. From the wild fruits H&H Fruit is organizing the purchase of the following:

WILD BLACKBERRY

WILD APPLE

HEZELNUT

WILD STRAWBERRY

WILD PEAR

JUNIPER

LINGONBERRY

BILBERRY

WILD RASPBERRY

BLACK AND WHITE  
MULBERRY
